# Electrical Design Solutions

Powerful design solutions for Electrical Engineers and Consultants

**AMTECH software is at the heart of leading electrical consultancies and contracting companies throughout the UK, as well as facilities management providers and major corporations.**

As our most advanced product range ever, AMTECH Power Software harnesses the latest technologies to deliver outstanding functionality with a host of features to enhance productivity, save time and increase profitability. Fully compliant with the 17th Edition Wiring Regulations, AMTECH is backed by BS EN 9001 TickIT certification for complete peace of mind.

**Four powerful software suites for projects of all sizes at Low Voltage or High Voltage**

- LV Electrical design and calculation to BS 7671: 2008
- LV/MV/HV Co-ordination studies and device selection
- Fault level analysis to IEC 60909 & BS 7639
- Quick single cable calculations to BS 7671: 2008
- Developed and supported under ISO 9001 Tick IT accreditation

**Save time, money and increase your professional advantage with the package that suits you!**

**ProDesign 100™**  
The ideal design solution to suit all medium sized LV projects

**ProDesign 200™**  
A massive 200 board capacity PLUS Protect HV for LV/MV/HV protection co-ordination studies

This software solution contains:

**ProDesign 100™**  
Design and calculate electrical systems to BS 7671:2008 up to 100 distribution board capacity. See page 6.

**Protect LV™**  
LV protective device selection.

**SingleCable™**  
Quick single cable calculations to BS 7671:2008.

Handles projects up to 100 boards from any one source plus the capacity of handling up to five alternative sources of supply. This is a popular package for low voltage distribution systems.

This software solution contains:

**ProDesign 200™**  
Design and calculate electrical systems to BS 7671:2008 up to 200 distribution board capacity. See page 6.

**Protect HV™**  
LV/MV/HV Protective device selection & co-ordination. See page 8.

**SingleCable™**  
Quick single cable calculations to BS 7671:2008.

In addition to handling larger projects, ProDesign 200 includes Protect HV which caters for LV, MV and HV co-ordination across any system voltage. It also includes powerful higher level functions and a massive database of devices including LV switchgear as well as sophisticated protection value. Contact us for more information.

Handbook factory planning and design pdf.

Wendahl, J. How it all started  
The first equipment is started by one source to have been catches made use of to aid with the catching of animals, corresponding to the maker as a device running separately or with really little force by communication from a human, with a capability for use repeatedly with operation exactly the exact same on every celebration of functioning. The wheel was developed c. 3000 BC, the spoked wheel c. 2000 BC, like  
Handbook Factory Planning And Design The Iron Age started roughly 1200-1000 BC. Nonetheless, various other sources define equipment as a means of manufacturing. You don't have to spend much time online to discover that you are not alone in your house planning, and you have many tools at your fingertips to help you enjoy the process even more. You can use online tools' libraries to select the items you want in the space and to place them accordingly. Author: Hans-Peter Wierendahl. This site is like a library.
